PROFILE

Computer Science Engineering graduate with hands-on experience building AI-powered and full-stack web applications using Java, Spring Boot, React, JavaScript, REST APIs, and Docker. Experienced in integrating AI/ML models with backend services and web interfaces through projects such as an AI-powered development environment using DeepSeek Coder. Strong foundation in DSA, OOP, DBMS, SQL, and software development fundamentals, with a keen interest in building scalable AI-powered products.

Education

Bachelor of Engineering in Computer Science Engineering 2022 – 2026
Government Engineering College Chamarajanagara CGPA: 8.7

Technical Skills

Programming: Java,Python,C
Frontend: HTML5, CSS3, JavaScript, ReactJS
Backend APIs: Spring Boot, Spring, REST APIs, FastAPI, JDBC
AI/ML: DeepSeek Coder 1.3B, Natural Language Processing, AI/ML Integration
Databases: MySQL, SQL
Tools & DevOps: Docker, Git, VS Code, Eclipse
Core Concepts: Data Structures, OOPS, DBMS, Operating Systems, CRUD Operations.

Projects

BugBuster IDE – AI-Powered Multi-Language Development Environment
Technologies: Java, Spring Boot, RestAPI, HTML5, CSS3, JavaScript, Docker

- Developed full-stack intelligent development environment with automated error detection and fixes across multiple programming languages.
- Built REST API backend using Spring Boot framework for handling code analysis requests.
- Integrated DeepSeek Coder 1.3B ML model for automated patch generation with Spectrum Based Fault Localization.
- Deployed application using Docker containerization for secure and reproducible code execution.

AI-Powered Chatbot
Technologies: Python, HTML5, CSS3, JavaScript, NLP

- Developed chatbot application capable of understanding user queries using Natural Language Processing techniques.
- Implemented intent recognition and context-aware response generation system.
- Built complete frontend-backend integration with Python backend and JavaScript frontend.

Internship

Software Engineer Intern 2026 – Present
NavaBharath Technologies, Mysore

- Contributing to the development of **MediUnify**, a healthcare platform with patient, hospital, pharmacy, and admin applications.
- Working on the **Hospital-side Web Application**, implementing healthcare workflows and user interfaces.
- Developing and refining **Admin and Patient-side features** based on project requirements.
- Collaborating with the team to understand requirements, implement changes, and improve application functionality.

Java Full Stack Developement Intern Jan 2026 – May 2026
QSpiders (A unit of Test Yantra Software Solutions India Pvt Ltd, Mysore)

- Developed mini full-stack applications using **React, JavaScript, HTML, CSS, and MySQL**.
- Worked with **CRUD operations, REST APIs, database design, Java, Spring, and Git**.

Achievements

Active Volunteer – Youth for Seva NGO

- Contributed to initiatives across education, environment, livelihood, and health domains.
- Collaborated with teams to organize and execute social impact activities, demonstrating leadership, teamwork, and communication skills.
- Awarded Seva Sadhaka recognition for dedicated volunteer service in Youth for Seva.

Soft Skills

Problem Solving, Analytical Thinking, Team Collaboration, Quick Learner and Good Communication.
